

INDUSTRIAL HOSES - TYGON®

TYGON® tubing and VERSILON™ tubing are manufactured from a variety of elastomers and plastics such as: silicone, PVC, polyurethane, fluoropolymers, thermoplastic elastomers. Regardless of the type, they are always made from the premium quality and purity materials, in controlled conditions, using the latest technology. Therefore, they are used in applications that require products of unique, laboratory quality and purity. TYGON® and VERSILON™ tubing - make a group of several tens of types of extruded tubing without reinforcement or braid-reinforced, intended for low working pressure, from a few to over ten bar and from an application-specific vacuum value up to full vacuum. Working temperature, depending on tubing material, reaches up to +200°C. The tubing is available in a wide range of dimensions - the same inner diameter comes in a couple of wall thickness options. Usually supplied by the manufacturer in 15 meter standard lengths.

TYGON® and VERSILON™ tubing meet the hygiene requirements of FDA, Pharmacopoeia, NSF-51, 3-A, ISO, EC directives. They are preferably used for applications which demand the fluid transfer conditions to be consistent, clean, sterile, completely chemically inert. The tubing is marked with LOT number to facilitate identification.

Main applications: transfer and dispensing of food and beverage products, scientific and industrial laboratories, medicine, pharmaceutical industry, biotechnology, chemical industry, fuel and oil hoses, semiconductor industry and electronics.

Many TYGON® and VERSILON™ tubing types are ideal for peristaltic pump application as they are soft enough, flexible, resistant to compression, spallation and flexural fatigue. In standard operation conditions the service life of the tubing in a peristaltic pump is over 1000 h.

We recommend to contact our experts in TUBES INTERNATIONAL® to select tubing appropriate for your application.

Following the most frequent applications, TYGON® and VERSILON™ tubing types can be divided into:

- food grade tubing:
TYGON® S3™ E-3603, TYGON® S3™ E-LFL, TYGON® S3™ B-44-3, TYGON® S3™ B-44-4X, TYGON® S3™ B-44-4X I.B., TYGON® S3™ M-34-R, TYGON® S3™ A24, TYGON® XL-60, TYGON® A-60-F (ex: NORPRENE® A-60-F), TYGON® A-60-F I.B. (ex: NORPRENE® A-60-F I. B.).
- tubing for pharmaceutical and biotech industry:
TYGON® 2475, TYGON® 2475 I.B., TYGON® 3350, TYGON® 3370 I.B., PHARMA PURE®, PHARMED®BPT,
- medical tubing:
TYGON® ND 100-65,
- general-purpose tubing:
VERSILON™ E-1000 (ex: TYGON® E-1000), VERSILON™ C-210-A (ex: TYGOTHANE®C-210-A), VERSILON™ C-544-AI.B. (ex: TYGOTHANE®C544-AI.B.), TYGON® A-60-G (ex: NORPRENE® A-60-G), VERSILON™ GSR (ex: GSR TUBING), VERSILON™ GA (ex: GA TUBING), VERSILON™, NITRILE (ex: NITRILE TUBING),
- fuel tubing:
TYGON® F-4040-A, TYGON® LP-1200, TYGON® LP-1100, TYGON® LP-1500, TYGON® LP-1600,
- chemical tubing:
TYGON® 2375, VERSILON™ F-5500-A (ex: FLURAN®), VERSILON™, TYGON® R-3400 (ex: TYGON® R-3400), TYGON® CHEMICAL (ex: NORPRENE® CHEMICAL), VERSILON™ ISO (ex: ISO-VERSINIC®), VERSILON™ SE-200 (ex: TYGON® SE-200), VERSILON™ PEEK™ (ex: ACUTECH PEEK™).

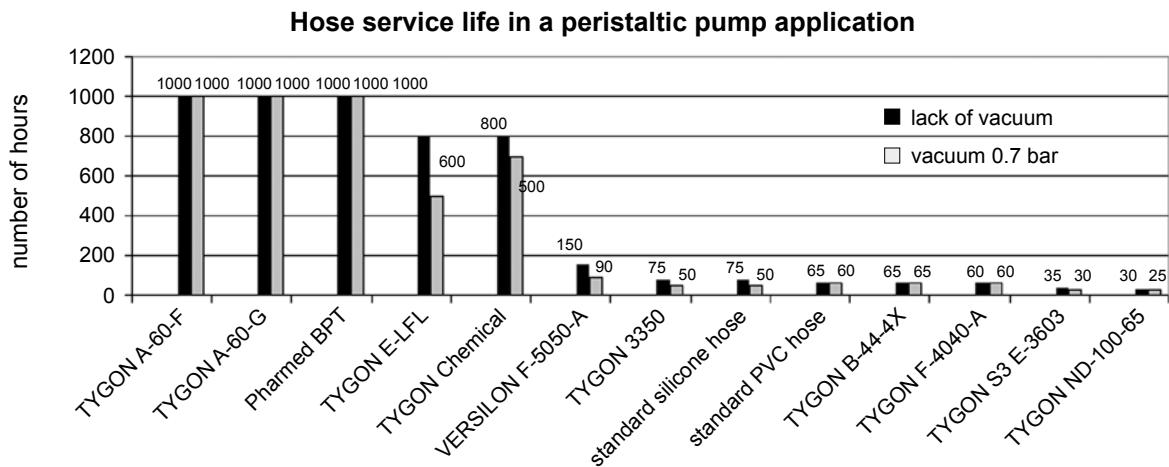

Main applications of TYGON® tubing:

- chemical processes,
- beverage, dairy products, foodstuffs transfer and dispensing,
- scientific and industrial laboratories,
- medicine (hospitals and laboratories),
- biotechnology and pharmaceutical industry,
- semiconductors, electronics, - peristaltic pumps.

The employees of Sales Department at TUBES INTERNATIONAL® will match your application to specific TYGON® tubing. The following information is required to facilitate the proper hose selection:

- medium,
- working temperature range,
- pressure,
- required dimensional tolerance,
- required hose flexibility, bending radius,
- ambient conditions,
- required cleaning method (sterilization),
- standards concerning hose material (FDA, ISO 10993, etc.),
- required resistance to flexural fatigue, spallation, decontamination with hose extractables, fluid absorption and adsorption, impurities build-up causing bacteria growth,
- waste disposal requirements for used hose.

INDUSTRIAL HOSES - TYGON®

The data above shows the performance of a number of hoses in a peristaltic pump with 3-roller pump head, operating at 600 RPM (room temperature (+23°C); 6.4 mm hose inside diameter; 9.6 mm hose outside diameter).

TYGON® is a registered trademark of SAINT-GOBAIN PERFORMANCE PLASTICS.

Clean Room

TUBES INTERNATIONAL® meets the requirements of very demanding customers by providing highly parameterized hoses and couplings that are used in very specialized and critical applications. The requirements regarding controlled working environment are typical for biotechnological, pharmaceutical, medical, food, computer, aircraft and semi-conductor industry. Our company - a provider of hose and hose assembly solutions for industry, as one of the first in East-Central Europe, has made an effort to ensure the highest standards in terms of cleanliness of assembly, packaging and customizing hoses and hose assemblies. CLEAN ZONE - CLEAN ROOM is equipped with professional appliances that allow effective control of internal and external surface of hoses and hose assemblies, enable secure packaging and customizing of products in controlled working environment.

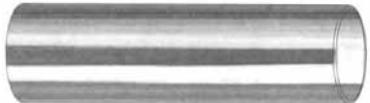

Today such hose features as: purity, mirror like surface, crystal clear surface, transparency, smoothness take on a new light in TUBES INTERNATIONAL®.

Please contact us if you are interested in the subject or require any additional information.

TYGON®, silicone or PTFE hoses can be assembled with various fittings. Hose assemblies that we make are clean and tight. They come in special heat sealed packaging that prevents contamination with dirt or dust from outside. The hoses are always packed and labeled with all important information on the hose (hose assembly): code (set number), LOT number, length, date of packaging, assembled fittings, etc. We can match the hose (hose assembly) to a specific application when we are provided with information on medium, working pressure and temperature, hose diameter and any other essential working conditions.

INDUSTRIAL HOSES - TYGON®

TYGON® S3™ E-3603

Max. working temp.: +74°C
Brittle temp.: -46°C
Hardness: 56° Shore (A)
Density: 1.21 g/cm³
Key features: General purpose,
peristaltic pumps

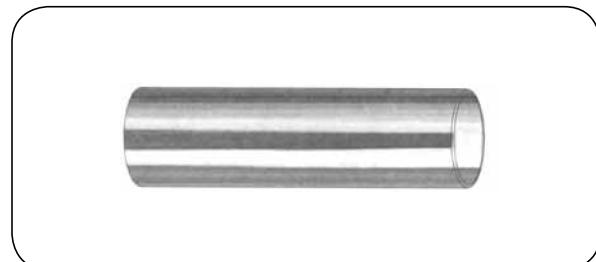

Crystal clear, flexible tubing for laboratory application. The glassy-smooth, non-porous internal surface helps to prevent impurities from adhering or building-up inside the tubing and facilitates cleaning. Total lot-to-lot consistency of tubing parameters. Phthalate-free and BPA-free (Bisphenol A-free). Steam sterilization and ethylene oxide sterilization. Meets the requirements of FDA, 3-A, NSF-51, USP Class VI as well as EU standards: 1935/2004/EC and 10/2011/EU. Complies with the requirements of REACH and of Japanese Food Sanitation Law # 370/1959. Tubing length 15 m.

TYGON® S3™ E-LFL

Max. working temp.: +74°C
Brittle temp.: -46°C
Hardness: 56° Shore (A)
Density: 1.17 g/cm³
Key features: Peristaltic pumps

Crystal clear tubing widely used in food, cosmetic, pharmaceutical and chemical industry due to its outstanding resistance to abrasion, spallation, ageing and chemicals. It is non-toxic. Phthalate-free and BPA-free (Bisphenol A-free). Steam sterilization and ethylene oxide sterilization. Meets the requirements of USP Class VI, FDA, 3-A, NSF-51, ISO10993 as well as EU standards: 1935/2004/EC and 10/2011/EU. The tubing is also compliant with REACH and Japanese Food Sanitation Law # 370/1959. Tubing length 7.5 m (from Ø 19 mm - 3 m).

TYGON® S3™ B-44-3

Max. working temp.: +74°C
Brittle temp.: -36°C
Hardness: 66° Shore (A)
Density: 1.21 g/cm³
Key features: General purpose food hose, phthalate free

Clear as glass, lightweight, flexible, phthalate-free tubing. Resistant to a wide range of chemicals. Steam sterilization and ethylene oxide sterilization. Suitable for peristaltic pumps. Meets the requirements of FDA, NSF-51, NSF-61, 3-A, EU:1935/2004/EC, 10/2011EU, REACH and of Japanese MHLW 370/3-D standard. Tubing length 15 m (from Ø 50.8 mm – 6m).

TYGON® S3™ B-44-4X-I.B.

Max. working temp.: +74°C
Brittle temp.: -36°C
Hardness: 66° Shore (A)
Density: 1.21 g/cm³
Key features: General purpose food hose

Flexible, reinforced with polyester braid, non-toxic, taste-free and odour-free tubing. The glassy-smooth, non-porous tubing surface helps to prevent impurities build-up and bacteria growth. Excellent resistance to harsh alkaline cleaners and sanitizers. Ethylene oxide sterilization. Meets the requirements of FDA 21 CFR 175.300, NSF-51, NSF-61, 3-A, Japanese MHLW 370/3-D standard and complies with European REACH standards. Tubing length 15 m (from Ø 38.1 mm - 6 m).

INDUSTRIAL HOSES - TYGON®

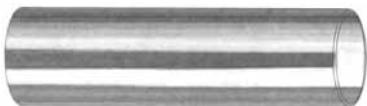

TYGON® S3™ M-34-R

Max. working temp.:	+74°C
Brittle temp.:	-36°C
Hardness:	66° Shore (A)
Density:	1.21 g/cm³
Key features:	For milk and dairy products transfer

Clear as glass, flexible, phthalate-free tubing. The smooth, non-porous tubing internal surface inhibits fats and other particle entrapment, which may cause bacteria growth. Meets the requirements of FDA 21 CFR 175.300, REACH standards as well as EU Regulations 1935/2004/EC and 10/2011/EU. Tubing length 30 m.

TYGON® S3™ A24

Max. working temp.:	+74°C
Brittle temp.:	-36°C
Hardness:	56° Shore (A)
Density:	1.21 g/cm³
Key features:	For milk and dairy products transfer

Phthalate-free tubing intended to convey air in automatic milking systems, resists full vacuum. As the tubing is crystal clear, the backflow of milk into the air lines can be easily detected. The tubing is designed to work with Tygon® S3™ M-34-R tubing in automatic milking process. Meets the requirements of FDA 21 CFR 175.300, NSF-51, 3-A and Japanese MHLW 370/3-D standard. Black tubing (Tygon A24-C) and twin tubing is available as well. Tubing length 30 m.

INDUSTRIAL HOSES - TYGON®

TYGON® XL-60

Max. working temp.:	+121°C
Brittle temp.:	-66°C
Hardness:	60° Shore (A)
Density:	0.9 g/cm³
Key features:	Peristaltic pumps

Lightweight, flexible, transparent and phthalate-free tubing (meets the requirements of EU 2002/72/EEC for materials that come into contact with food). Extremely flexible, resistant to ozone, oxygen and ageing. Resistant to most acids and bases. Not suitable for media containing fat. Steam, ethylene oxide or radiation sterilization. Meets 94-HB flammability rating. Additionally, it is compliant with the following standards: FDA 21 CFR 177.1210, NSF-51 and UE:1935/2004/EC, 10/2011EU.

INDUSTRIAL HOSES - TYGON®

TYGON® 2475

Max. working temp.:	+52°C
Brittle temp.:	-78°C
Hardness:	72° Shore (A)
Density:	0.90 g/cm³
Key features:	Hydrophobic, chemical resistance

Transparent, flexible tubing resists the absorption/adsorption of aqueous fluids. The rate of particle migration through the tubing wall is very low. Lack of plasticizers prevents potential contamination of the fluid flowing through the tubing. Ethylene oxide or radiation sterilization up to 2.5 MRad. Meets the requirements of FDA and USP class VI. Tubing length 15 m (Ø 25.4 mm - 7.5 m).

TYGON® 3350

Max. working temp.: +204°C

Brittle temp.: -80°C

Hardness: 50° Shore (A)

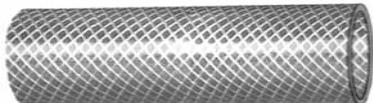

Density: 1.14 g/cm³

Key features: Pharmacology and biotechnology application

Translucent, flexible silicone tubing made of platinum cured silicone. The tubing features excellent flow rates, facilitates cleaning, prevents bacteria build-up and growth. It is non-toxic, non-haemolytic and non-pyrogenic. Steam, ethylene oxide or radiation sterilization up to 2.5 MRad. Meets the requirements of: FDA 21 CFR Part 177.2600; 3-A; NSF-51 and ISO10993 for use in contact with blood (body fluids, tissue) up to the maximum period of 30 days. Tubing length 15 m.

INDUSTRIAL HOSES - TYGON®

PHARMED® BPT

Max. working temp.: +135°C

Brittle temp.: -75°C

Hardness: 64° Shore (A)

Density: 0.98 g/cm³

Key features: Pharmacology and medical application, peristaltic pumps

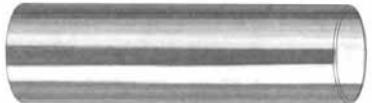

Beige, flexible tubing manufactured in compliance with ISO 10993 standard ensures full biological safety. The tubing can be exposed to gamma radiation (isotope of cobalt 60) up to 5 MRad with no significant change to physical properties. Steam sterilization and ethylene oxide sterilization is also acceptable. Complies with FDA 21 CFR 177.2600, NSF-51, USP class VI and ISO 10993. Tubing length 7.5 m.

Silicone and TYGON® hoses are also available as hose assemblies with fittings according to customer specifications.

INDUSTRIAL HOSES - TYGON®

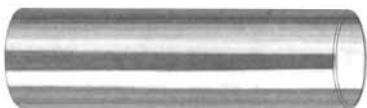

TYGON® ND100-65

Max. working temp.: +74°C
Brittle temp.: -42°C
Hardness: 65° Shore (A)
Density: 1.19 g/cm³
Key features: Medical application,
peristaltic pumps

Clear as glass, flexible, phthalate-free and biocompatible tubing. Manufactured in compliance with ISO 10993 standard ensures full biological safety. Because of its construction, the tubing is particularly recommended for blood transport, dialysis equipment, wound drainage, etc. Steam, ethylene oxide or radiation sterilization up to 5 MRad. Meets the requirements of USP Class VI, European Pharmacopoeia 3.1.1.2, ISO 10993 as well as European REACH standards. Tubing length 15 m.

INDUSTRIAL HOSES - TYGON®

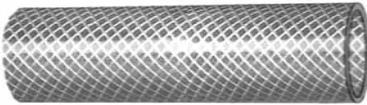

VERSILON™ E-1000

Max. working temp.:	+52°C
Brittle temp.:	-55°C
Hardness:	40° Shore (A)
Density:	1.1 g/cm³
Key features:	General purpose laboratory hose

Transparent, plasticizer-free, soft and flexible tubing highly resistant to aggressive chemicals. Because the tubing has a very low hardness level, it is ideal for low torque or battery-powered peristaltic pumps. Ethylene oxide sterilization. Suitable for viscous media. Meets the requirements of FDA, NSF-51, REACH standards. Tubing length 15 m.

VERSILON™ C-544A I.B.

Max. working temp.:	+82°C
Brittle temp.:	-73°C
Hardness:	85° Shore (A)
Density:	1.12 g/cm³
Key features:	General purpose polyurethane hose

Translucent, flexible tubing with polyester braid reinforcement. A superb standard of consistency of dimensions in every production process facilitates proper and leak-tight assembly. High tear strength and excellent abrasion resistance make it an ideal solution for fuel and lubricant lines, pneumatic lines, pneumatic transfer of abrasive products, cable jacketing and many other industrial applications. Meets the requirements of FDA 21 CFR, 177.1680 i 177.2600 and NSF-61. Tubing length 30 m.

INDUSTRIAL HOSES - TYGON®

VERSILON™ GSR

Material:	Natural red rubber
Max. working temp.:	+70°C
Brittle temp.:	-40°C
Hardness:	45° Shore (A)
Density:	1.13 g/cm³
Key features:	General purpose

Lightweight, ultra-flexible tubing. Abrasion resistance and very low permeation rate make the tubing suitable for a range of industrial applications. GSR SEMI-VACUUM and GSR VACUUM hoses are intended for vacuum systems. Steam sterilization and ethylene oxide sterilization. Meets the requirements of FDA.

INDUSTRIAL HOSES - TYGON®

VERSILON™ GA

Material:	Light brown natural rubber
Max. working temp.:	+70°C
Brittle temp.:	-40°C
Hardness:	40° Shore (A)
Density:	0.98 g/cm³
Key features:	General purpose, 500% elongation

Lightweight, flexible tubing with properties similar to latex rubber. Can be used as its substitute. Easy to mount, used in laboratories, for blood and tissue testing, for dispensing cleaners. Resistant to abrasion. Steam sterilization and ethylene oxide sterilization. Compliant with FDA.

INDUSTRIAL HOSES - TYGON®

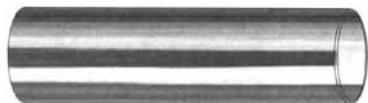

VERSILON™ NITRILE

Material:	Black NBR rubber
Max. working temp.:	+100°C
Brittle temp.:	-20°C
Hardness:	65° Shore (A)
Density:	1.45 g/cm³
Key features:	General purpose

Lightweight, flexible tubing with superb resistance to aliphatic hydrocarbons, good resistance to aromatic solvents and alcohols. Low gas permeability rate. Used in fuel installations, gas and lubricant lines and for petrochemical products transfer. Average resistance to ageing and light.

TYGON® F4040-A

Max. working temp.:	+74°C
Brittle temp.:	-37°C
Hardness:	57° Shore (A)
Density:	1.26 g/cm³
Key features:	For petrochemical products

Transparent, yellow, flexible tubing resistant to ageing, ozone, UV radiation, swelling and hardening caused by washing out of plasticizers. Very low permeation rate of aromatic hydrocarbons. Tubing length 15 m.

INDUSTRIAL HOSES - TYGON®

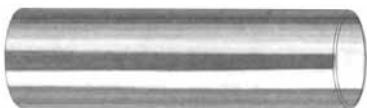

TYGON® LP-1100

Max. working temp.:	+82°C
Brittle temp.:	-29°C
Hardness:	69° Shore (A)
Density:	1.26 g/cm³
Key features:	For petrochemical products with ethanol content up to 100%

Transparent, yellow, flexible tubing with fluoropolymer internal layer, resistant to swelling and hardening caused by liquid hydrocarbons or acid gases. Very low permeation rate of aromatic hydrocarbons. Meets the requirements of EPA and CARB standards. Resistant to ozone and UV radiation. Perfect as a fuel line in chainsaws, lawnmowers, etc. Tubing length 15 m.

TYGON® LP-1200

Max. working temp.:	+82°C
Brittle temp.:	-28°C
Hardness:	78° Shore (A)
Density:	1.27 g/cm³
Key features:	For petrochemical products with ethanol content up to 100%

Transparent, flexible tubing resistant to swelling and hardening caused by washing out of plasticizers. Very low permeation rate of aromatic hydrocarbons. Meets the requirements of EPA and CARB standards. Resistant to UV radiation: complies with the requirements of ANSI B175.1 Annex D standard. Perfect as a fuel line in chainsaws, lawnmowers, etc. Tubing length 15 m.

INDUSTRIAL HOSES - TYGON®

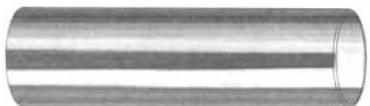

TYGON® LP-1500

Max. working temp.:	+85°C
Brittle temp.:	-40°C
Hardness:	35° Shore (A)
Density:	1.18 g/cm³
Key features:	For petrochemical products with ethanol content max. 10%

Transparent, flexible tubing resistant to wear and kinking. Very low permeation rate of aromatic hydrocarbons. Meets the requirements of EPA and CARB standards. Resistant to UV radiation: complies with the requirements of ANSI B175.1 Annex D standard. Perfect as a fuel line in chainsaws, lawnmowers, etc. Tubing length 15 m.

TYGON® 2375

Max. working temp.:	+54°C
Brittle temp.:	-75°C
Hardness:	75° Shore (A)
Density:	0.90 g/cm³
Key features:	Chemical resistance

Transparent, flexible tubing resistant to acids, bases, salts, ketones and alcohols. The material of the tubing is completely free of plasticizers and thus prevents potential contamination of the fluid flowing through the tubing and its premature failure. The smooth inner surface prevents impurities build-up. Ethylene oxide or radiation sterilization. Complies with FDA 21 CFR 177.1520, REACH, NSF-51 and 10/2011EU. Tubing length 15 m (Ø 25.4 mm - 7.5 m).

INDUSTRIAL HOSES - TYGON®

VERSILON™ F-5500-A

Max. working temp.:	+204°C
Brittle temp.:	-51°C
Hardness:	60° Shore (A)
Density:	1.90 g/cm³
Key features:	High chemical and temperature resistance

Opaque, black, flexible tubing made of fluoroelastomer. Resistant to ageing, ozone and weather conditions. Recommended for light-sensitive fluid transfer. The best choice for peristaltic pumps transferring extremely aggressive media. A food grade version is also available. Tubing length 15 m.

TYGON® R-3400

Max. working temp.:	+74°C
Brittle temp.:	-21°C
Hardness:	64° Shore (A)
Density:	1.31 g/cm³
Key features:	UV resistant

Lightweight, flexible, black tubing resistant to chemicals, ozone and weather conditions. Complies with the requirements of UL 94V-O and UL94HB standard for flammability. Particularly recommended for light-sensitive media, which undergo degradation when affected by light. Also used for computer processor cooling. Tubing length 15 m.

TYGON® CHEMICAL TUBING

Max. working temp.:	+74°C
Brittle temp.:	-60°C
Hardness:	61° Shore (A)
Density:	0.98 g/cm³
Key features:	Chemical hose, peristaltic pumps

Cream-coloured, flexible tubing with inner surface resistant to chemicals, plasticizer-free, unaffected by acids, bases, salts, ketones, alcohols but also resistant to cleaners and sanitizers. Steam, ethylene oxide or radiation sterilization. Meets the requirements of FDA 21 CFR 177.1520. Tubing length 15 m.

INDUSTRIAL HOSES - TYGON®

VERSILON™ SE-200

Max. working temp.:	+74°C
Brittle temp.:	-36°C
Hardness:	66° Shore (A)
Density:	1.21 g/cm³
Key features:	High chemical resistance, phthalate free

Transparent tubing with inner layer made of FEP fluoropolymer which is entirely physically and chemically inert. Taste and odour-free. Used for the transfer of highly aggressive chemical products, solvents, methyl ethyl ketone (MEK), etc. Ethylene oxide sterilization. Meets the requirements of FDA 21 CFR Part 177.1550. Tubing length 15 m.

VERSILON™ PEEK™

Material:	PEEK (polyetheretherketone)
Working temp.:	From -60°C up to +250°C (with peaks up to +310°C)
Hardness:	75° Shore (A)
Density:	1.31 g/cm³
Key features:	Pressure resistance

Lightweight, brown capillary tubing with excellent resistance to aggressive chemicals. The smooth inner surface prevents impurities build-up. Suitable for high pressure applications, e.g. chromatography. More resistant to corrosion than stainless steel. Resistant to abrasion and leaching. Can be used for steam transfer applications. The working pressure of this tubing is limited only by the working pressure of the assembled fitting. Meets the requirements of FDA and USP Class VI.
